Re: NESHAPS Asbestos Violation
Paulding
Paulding County - *Haz. Wastes*

CERTIFIED MAIL

Nuturn Corporation
570 Metroplex Drive
Nashville, Tennessee 37211

March 1, 1984

Attn: Colin Sinclair, President

Dear Mr. Sinclair:

This letter will serve as notice that your company located at 700 West Caroline Street in Paulding, Ohio remains in violation of National Emission Standards for Hazardous Air Pollutants involving Asbestos.

This site was inspected on August 16, 1983, and again on February 15, 1984. Samples were taken and laboratory analysis indicated asbestos present in waste. The following violations were observed:

1. Asbestos wastes were found dumped in an area behind the plant in an unapproved site without proper containment and public warning. This is in violation of 40CFR Section 61.22(1). This presents a public health hazard and therefore requires immediate correction.
2. Visible emissions were observed coming from a large open door of the plant. This is in violation of 40CFR Section 61.22(1) - No visible emissions limitation.

Therefore, you are hereby advised to make the following corrections:

1. Within one week of receipt of this letter, a dust suppressant shall be applied to all exposed asbestos wastes and plant shall be locked up.
2. Within two weeks, work shall begin to fence the entire dump area, and proper warning signs shall be posted. Also, a final proposal to bring the area into compliance shall be submitted to this Agency.
3. Within 45 days, the site shall be completely secured in compliance with 40CFR Section 61.22(1).

District Office

ve Drive, Bowling Green, Ohio 43402-4598 (419) 352-8461

Nuturn Corporation

4. Written notification describing the action to be taken with these steps shall be submitted to OEPA when each of these steps is begun.

If you have questions or feel you can provide a more effective compliance schedule, please contact me immediately.

Sincerely,

Don North
